**Re: Reference for Ball Construction
IBEW Union Hall, 5158 Fountain St N, Breslau, ON**

To Whom it may concern,

We have had the good fortune to work together with Ball Construction on numerous Projects over the past fifteen years. These Projects have ranged in size from \$500,000 to in excess of \$5,000,000 in construction value. The built project has proven to be a great success and, the quality of its construction is a testament to Ball Constructions abilities, perseverance and professionalism.

Ball Construction consistently exhibits high levels of professionalism and accountability and works diligently to ensure that aspects of Cost Control, Project Scheduling, and Quality Control are always priorities.

We continue to include Ball Construction as a recommended General Contractor for much of our residential, commercial, institutional, and industrial Work.

Yours truly,
